About Me

Passionate web developer skilled in React.js, Next.js, Node.js, and MongoDB. Focused on building high-performance, scalable, and user-friendly web applications. Seeking opportunities to contribute and grow in a dynamic team.

Project

Visa Navigator Portal

A user-friendly portal for checking visa requirements and tracking visa applications.

[Live Project](#) | [Client GitHub](#)

- Dynamic UI with Firebase authentication.
- Visa data management with MongoDB integration.
- Role-based access for applicants and administrators

Product Hunt

A MERN stack product discovery platform where users can submit, upvote/downvote, review, and subscribe to premium features

[Live Project](#) | [Client GitHub](#)

- Authentication with user roles (admin, moderator, user).
- Upvote/downvote system with real-time updates.
- Payment integration for premium features.

Historical Artifacts Tracker

A web application for tracking, displaying, and managing historical artifacts like the Rosetta Stone and Antikythera Mechanism.

[Live Project](#) | [Client GitHub](#)

- Secure authentication with Firebase Authentication.
- Full CRUD operations for managing artifacts.
- Responsive design with search functionality.

Extra-Curricular Activities

- Programming Contests
- Hackathons: Engaged in web development hackathons.
- Treasurer Role: Served as Treasurer in college
